

PROJECT HIGHLIGHTS

MakeUofT Hardware Signout

Apr 2020 — Present

- Design and developing an inventory and sign-out system for hardware components using **Figma, ReactJS, Django, & Sass**.
- Incorporated user research from previous hackathons aiming to reduce hardware wait times by 1.5 hours.
- Intended use for 5000+ hardware components and 300+ participants at hardware-oriented hackathon, MakeUofT.

Aweary — RBC AmpHacks 2019, 3rd Place

Sept 2019

- Designed proof-of-concept mobile app to wake users up on their commute using **Figma**.
- Awarded **3rd place** out of 40+ projects and 200+ participants.

notepal — UofTHacks VI, 1st Place

Feb 2019

- Implemented an automated note-taking device that uses computer vision and Speech-To-Text NLP to generate LaTeX documents.
- Designed and built a site to display documents retrieved from database using **Sketch, JS & HTML/CSS**.
- Awarded **1st place** and recipient of Best Use of Google Cloud Platform award at MLH hackathon out of 100+ projects and 400+ participants.

WORK EXPERIENCE

Select Equity Group, New York City — Data Science / Engineer Intern

Sept 2020 — Present

- Developing data pipelines using Python and creating Tableau dashboards to deliver bespoke insights on data trends.

Intel Corporation, Toronto — Software Engineer Intern

Summer 2020

- Designed and developed a spreadsheet system to capture feedback on open tickets from project owners using Python to save 7 man hours per week.

Publicis Sapient, Toronto — Software Engineer Intern

Summer 2019

- Analyzed and improved performance of \$400 million+ e-commerce site to optimize its search engine ranking using **ReactJS, JS, & Sass/LESS**.
- Pitched and built a Twitter analytics tool prototype to provide personalized marketing insight on leveraging social media influencers and trends using **ReactJS, Flask, & Sass/CSS**.

Morneau Shepell, Markham — IT Intern (UI/UX)

Summer 2017, Summer 2018

- Designed and developed internal helpdesk portal for clients to access data stored in our back-end using **JS & HTML/CSS**.
- Created mockups for prototyping and development for 10+ web and mobile projects using **Sketch** and Invision.
- Featured design includes login and registration page that decreased average time of user flow by **39%**.

EDUCATION

University of Toronto

Expected April 2022

- BAsC in **Engineering Science**.
- Specialization in **Machine Intelligence**, minor in **Engineering Business**.

SKILLS

- **Figma, Sketch**, Invision, & Craft
- Tableau and data visualization
- **ReactJS, JavaScript, Sass/LESS/ CSS, & HTML**.
- Python (PyTorch, TensorFlow), C, & PostgreSQL.

INTERESTS

- Architecture & interior design.
- Event planning.
- Experience in watercolor, oil paint, and cartoon sketching.
- Playing the flute and piano.
